

**Student Success BY THE NUMBERS:
Building Capacity for a Culture of Evidence
In Texas Community and Technical Colleges**

Project Description

The Student Success BY THE NUMBERS Initiative was designed to build the capacity of community and technical colleges in the state of Texas to understand and communicate about data depicting student success and institutional performance. The key objectives were to help colleges advance their institutional capacity to collect, analyze, and effectively use a variety of data depicting student progress, engagement, and success; to use those data in targeting and monitoring improvements in postsecondary preparation, access, persistence, and completion; and to build an increasingly powerful culture of evidence to support and promote an effective student success agenda.

The initiative was supported by the Greater Texas Foundation and directed by the Program in Higher Education Leadership in the College of Education at The University of Texas at Austin.

Participating Colleges

- Angelina College
- Cisco College
- Clarendon College
- Eastfield College
- Grayson County College
- Howard College
- Laredo Community College
- McLennan Community College
- Midland College
- Mountain View College
- North Central Texas College
- Northeast Texas Community College
- Ranger College
- Vernon College
