

STUDENT SUCCESS BY THE NUMBERS

Texas Community College Success Points

TEXAS COMMUNITY COLLEGE SUCCESS POINTS

Background

Based on the premise that educational achievement includes more than just traditional, terminal accomplishments, the Milestones Model was developed to measure the performance of institutions in a way that would promote their efforts to increase the rate of student progression and achievement.

Success points are measurable attainments correlated with the completion of a milestone. And by measuring them, we can accurately gauge institutions' progress in helping students succeed. Milestones can be sets of courses (such as a developmental education series), particular courses (such as first college level courses) or levels of educational attainment.

The Milestones

How are Points and Funding Calculated?

Since the points are based on milestones achieved, an individual student can earn multiple points. For illustrative purposes, based on data currently collected, points are awarded for students who enroll in current year:

- Became college ready (met TSI standards in math, reading, or writing); 2 points total, one for math, .5 for reading, and .5 writing
- Completed the first college level math course; 1 point
- Completed the first college level reading/writing course; .5 point for reading, .5 point for writing, 1 point for reading/writing intensive
- Completed their first 15 hours; 1 point
- Completed their first 30 hours; 1 point
- Earned a degree or certificate; 2 points
- Earned a degree or certificate in a critical field; additional 0.25 point
- Transferred after having completed 15 hours; 2 points

The total number of points across all institutions is divided into the funding available to derive a dollar per point amount. Once multiplied by the number of points for each institution, the result is the amount of success point funding per institution.

STUDENT SUCCESS BY THE NUMBERS

Data Definitions

DATA DEFINITIONS

The cohort is the unduplicated number of students enrolled in the fiscal year being measured for success points. The program tracks students back two fiscal years into CBM001 (enrollment) data to find the first time (FTUG) enrolled. Students who are enrolled for the first time in the fiscal year measured can also be counted as first time. The FTUG flag is only applicable when determining readiness within 2 years. Other points, based on successfully completed hours, are from the CBM002 (Texas Success Initiative Report) and the CBM00S (Student Schedule Report). The points are earned by how students performed:

* * *

Measure 1: College Readiness

MATH

Methodology: Determine student's readiness as first time undergraduate (FTUG). Only students who are not ready in math as FTUG can potentially qualify for a point. If the student is not ready as FTUG at either the same institution or another institution, but became ready for the first time at the same institution as the cohort record in math in year measured, then a point is awarded.

READING

Methodology: Determine student's readiness as first time undergraduate (FTUG). Only students who are not ready in reading as FTUG can potentially qualify for a point. If the student is not ready as FTUG at either the same institution or another institution, but became ready for the first time at the same institution as the cohort record in reading in year measured, then .5 point is awarded.

WRITING

Methodology: Determine student's readiness as first time undergraduate (FTUG). Only students who are not ready in writing as FTUG can potentially qualify for a point. If the student is not ready as FTUG at either the same institution or another institution, but became ready for the first time at the same institution as the cohort record in writing in year measured, then .5 point is awarded.

Measure 2: Complete First College-Level Math Course

Methodology: Student passes first college level math course at same institution as the cohort record with "A", "B" or "C" in fiscal year measured.

Measure 3: Complete First College-Level Reading/Writing Course

Methodology: Student passes first college level reading/writing course at same institution as the cohort record with "A", "B" or "C" in fiscal year measured.

STUDENT SUCCESS BY THE NUMBERS

Data Definitions

DATA DEFINITIONS, CONT.

Measure 4: Completed 15 Hours

Methodology: Accumulate students' completed hours from 3 previous years, plus the year being measured. If the student reaches at least 15 completed hours at same institution as the cohort record for the first time in year measured, then a point is awarded.

Measure 5: Completed 30 Hours

Methodology: Accumulate students' completed hours from 3 previous years, plus the year being measured. If the student reaches at least 30 completed hours at same institution as the cohort record for the first time in year measured, then a point is awarded.

Measure 6: Degrees, Core Curriculum Completers and Certificates Awarded

Methodology: Point is awarded to a student who completes a degree, certificate or core curriculum completer (CCC). Unduplicated degrees and certificates awarded in the fiscal year being measured are counted. Highest award is selected based on the following order (BAT, Associates, Core Curriculum Completer, Certificate Level 1/2 or Advanced Technology Certificate). This measure is not tied to the cohort for readiness, first college-level course, completed hours or transfer.

Measure 7: Graduates in Critical Fields

Methodology: Point is awarded to a student who completes a degree or certificate in a STEM or allied health major. Unduplicated degrees and certificates awarded in the fiscal year being measured. Highest award is selected based on the following order (BAT, Associates, Certificate Level 1/2 or Advanced Technology Certificate). This is not tied to the cohort for readiness, first college-level course, completed hours or transfer. Majors include CIPs ("11" "14" "15" "27" "40" "3001" "5116" "5138" "5139" "5102" "5106" "5107" "5108" "5109" "5110" "5118" "5123" "5126" "5127" "5199" "5131" "5132" "5133" "5134"). Students who earned an award are counted in this measure and can also be counted in measure 6. Critical graduates are a subset of all degrees and certificates.

Measure 8: Transfer to a 4-Year Institution

Methodology: Accumulate students completed hours from 3 previous years, plus the year being measured. If student completed at least 15 hours at the same institution as the cohort record and is found at public/private four-year institution for the first time in year measured, then point is awarded.

Numbers presented here are rounded, so they may differ from the Accountability System by less than 1.

STUDENT SUCCESS BY THE NUMBERS
