Introduction

The cost of attending community college is a concern for many community college students: approximately 47% of *CCSSE* respondents report that lack of finances is an issue that could cause them to withdraw. The special report and this methodology supplement explore students' perceptions of their financial health. To identify the data highlighted in the special report, many analyses were conducted and reviewed; this supplement includes the results presented in the report as well as the results from all other analyses that were conducted in preparation of this report.

Methods

About the Survey

CCSSE is a paper-pencil survey administered in class during the spring to students enrolled in randomly selected credit-bearing courses. When responding, students are instructed to consider their experiences during the current academic year. Survey items focus on educational practices and student behaviors associated with higher levels of learning, persistence, and completion. Completed surveys, once scanned into a data set are reviewed for several Center exclusion criteria. Students who meet the following criteria are removed from the analysis data set: students under the age of 18; students who did not indicate their enrollment status (Item 2); students who indicated that they have taken the survey in another class this term on Item 3; and, on Item 4, respondents who did not answer any of the 21 sub-items, answered "Never" to all 21 sub-items, or answered "Very often" to all 21 sub-items. Readers should keep in mind that *CCSSE* respondents are typically returning students. Although the experiences of many community college students who do not return after their first academic term are not represented in the survey results, a minority of *CCSSE* respondents are in their first term.

Data

Data for this report come from the 2016 administration of the Community College Survey of Student Engagement (CCSSE); additionally, some participating colleges also administered five special focus items on “part-timeness.” Participating colleges had the option of administering 15 additional items on financial health; 177 colleges administered this item set to 99,721 students, and results are based on this set of respondents. The number of respondents for items in this summary vary, based for the most part on missing data. However, in some cases, respondents were excluded from cross-tabulations based on their response to one of the items. For example, the cross-tabulation between the item “I have too much student loan debt right now” (variable Q8) and other items excludes those respondents who reported they have no student loan debt. The tables in which this occurs are identified in the page title. One item from the “Part-Timeness” special-focus item set (“What is your number one goal for attending this college?” [variable Q3]) was also used in the analysis for *Making Ends Meet*. Demographic characteristics of the respondents are presented in the frequency tables in the Results section of this document.

Analyses

Non-Center data

Several of the data points presented in *Making Ends Meet* are from non-Center data. When possible, Center researchers attempt to locate relevant data from reliable sources in which the data can be verified. For the “Gap Between Pell Grants and Need” chart on page 3, verifiable data was not found so Center staff used original data from two sources to generate the data presented. The percentage of average total costs covered by a Pell Grant in 2011-12 was calculated by

dividing the maximum Pell Grant award in 2011-12 (\$5,500¹) by the average total price of attending a public two-year college full time (\$15,000²).

Center data

The analyses conducted for the special report and for this supplement include simple frequencies and cross-tabulations (crosstabs) of pairs of variables. Many variables have been recoded into dichotomous responses (e.g., *Not Applicable*, *Disagree*, *Strongly Disagree*, *Agree*, *Strongly Agree* were recoded to *Disagree/Agree*, with *Not Applicable* responses excluded.) Item 18e on the main survey asks if student loans are a major or minor source used to pay tuition at the college. This item has been dichotomized from “*Not a Source*, *Minor Source*, *Major Source*” to “*Not a Source*” or “*Is a Major or Minor Source*.”

The FREQ procedure in SAS 9.4 was used to calculate the frequencies, percentages, and cross-tabulations of all students responding to the main CCSSE and the additional financial health item set; demographic tables are presented first, followed by frequencies and cross-tabulations, presented in the order they appeared in the *Making Ends Meet* report. Following these tables are additional cross-tabulations of the financial health items, with demographics and other survey items, which were not used in the main report.

Weighting

Sampling procedures for CCSSE introduce a known bias resulting in full-time students being overrepresented among respondents (see “Are Your Data Worth the Weight?” for a discussion of CCSSE sampling and weighting at <http://www.CCSSE.org/center/publications/newsletter/14.1/>).

¹ U.S. Department of Education, Office of Postsecondary Education. (2013). *2011–2012 Federal Pell Grant program end-of-year report*. Table 1, part 5. Retrieved from <http://www2.ed.gov/finaid/prof/resources/data/pell-2011-12/pell-eoy-2011-12.html>

² Radwin, D., & Chang Wei, C. (2015, March). *What is the price of college? Total, net, and out-of-pocket prices by type of institution in 2011–12* (NCES Stats in Brief No. 2015-165). Table 1. Retrieved from National Center for Education Statistics website: <http://nces.ed.gov/pubs2015/2015165.pdf>

With the exception of frequencies for student demographics, enrollment status, and cross-tabulations involving enrollment status (ENRLMENT), all results presented in this supplement and in *Making Ends Meet* are weighted. Because of the weighting, frequency counts will include decimal points.
