Introduction

Community colleges face a pressing need to develop effective guided career pathways. These pathways can empower underserved and underrepresented students, including adult learners, to achieve career success in today's rapidly changing and competitive job market. This report leverages statistical analysis of large-scale Community College Survey of Student Engagement (*CCSSE*) data. It sheds some light on community college students' understanding of career paths and the sources they rely on to guide their decisions, providing a window into students' career aspirations and goals. Notably, the report identifies internship-type experiences as a critical factor for students to gain important knowledge about the skills they would need for their chosen career path. It is worth mentioning that this methodology supplement includes the results presented in the report as well as the results from all other analyses that were conducted in preparation of this national report.

Method

DATA

The data presented in this report were collected from the Community College Survey of Student Engagement (*CCSSE*) and five special-focus items included with *CCSSE* in 2023. *CCSSE* is administered during the spring academic term; all students over the age of 18 in credit-bearing classes or developmental education courses are eligible to participate in the survey. Students are instructed to consider their experiences over the whole academic year when completing *CCSSE*. Colleges have the choice of administering the survey online or in class on paper. For the paper administration, colleges provide a list of all credit-bearing and developmental education courses to *CCSSE*, and the research team draws a random sample of classes in which the survey will be administered. For the online administration, participating colleges send a survey link to all eligible students as there is no sampling with the online administration.

To better illustrate the results, we performed data cleaning to remove invalid responses for items 2, 4, and 5, and then recoded these items. Item 2: *How much has your coursework at this college provided information about the skills you will need in your chosen career path?* a. Not at all b. Very little c. Somewhat d. Very much e. I have not chosen a career path. Item 4: *How much has this college helped you learn about the average earnings for your chosen career* a. Not at all b. Very little c. Somewhat d. Very much e. I have not chosen a career path? Item 5: *Of the following, which do you rely on the most for information about your chosen career path?* a. Instructors b. Advisors/Counselors c. Friends or family d. Current employer e. I have not chosen a career path. We removed inconsistent responses (e.g., students scored c on item 2, e on item 4 and d on item 5), and recoded option e of these items to missing (“.”) as the report focuses on students who have chosen a career path. For the results presented in the report, we removed students who said they had not chosen a career path prior to running the analysis. This report contains data from 83,189 community college students across 199 colleges who responded to the *CCSSE* in spring 2023.

ANALYSES

Benchmarks are groups of conceptually related survey items that focus on institutional practices and student behaviors that promote student engagement—and that are positively related to student persistence and completion. The five *CCSSE* benchmarks of effective educational practice in community colleges are active and collaborative learning (ACTCOLL), student effort (STUEFF), academic challenge (ACCHALL), student-faculty interaction (STUFAC), and support for learners (SUPPORT). To learn more about how *CCSSE* benchmarks are calculated, please see https://www.ccsse.org/survey/docs/HowBenchmarksAreCalculated_2022.pdf

The analyses conducted for the report and this supplement include simple frequencies and cross-tabulations involving individual items and item pairs. Means were used for the analysis of benchmark scores. The FREQ procedure was used to calculate the frequencies, percentages, and cross-tabulations of all student responses to the main *CCSSE* and five special-focus items.

WEIGHTING

We used weighting to correct for a respondent bias due to the fact that a disproportionate number of full-time students and women completed the survey. (see “*CCSSE* Sampling, Weighting, and Local Student Characteristics” for a discussion of sampling and weighting at <https://www.ccsse.org/survey/reports/2022/understanding.cfm#weights>). With the exception of frequencies for student demographics, enrollment status, and cross-tabulations involving enrollment status (ENRLMENT) and/or gender identity (GENDER), all results presented in the report and this methodology supplement are weighted. Because of weighting, frequency counts in this supplement will include decimal points; counts in the report are rounded to the nearest integer.
